3. ☐ Reference data _____
4. ☐ Applicant shall abandon the existing septic system in accordance with Section 1119 of the current Uniform Plumbing Code and Section 4-6-040.I.6 of the City Code.
5. ☐ Customers making a first time connection to sanitary sewers in King County, including Renton's Sewer Service Area, are subject to a sewage treatment capacity charge. The purpose of this **King County charge** is to pay for building sewage treatment capacity to serve newly connected customers. Single-family customers pay \$42.00 a month (billed **by King County** as \$252.00 every six months) for 15 years. At the customer's choice, this fee may be paid **to King County** as a lump sum of \$5,196.00. This fee is in addition to the monthly charge for treatment that Renton is required to collect and pass to King County.
6. ☐ The Renton portion of the Wastewater Utility Rates for customers outside the city limits is 1.5 times the standard rate for customers inside the city limits. (City Code section 8-5-15C)
7. ☐ The proposed project is within the corporate limits of the City of Renton or has been granted King County Boundary Review Board (BRB) approval for extension of service outside the City..
- or** ☐ Annexation or BRB approval will be necessary for the provision of sanitary sewer service.
8. ☐ The sewer system improvement is in conformance with a County approved sewer comprehensive plan.
- or** ☐ The sewer system improvement will require an amendment to the Renton Long-Range Wastewater Management Plan.
9. ☐ The sewer system improvement will be within an existing franchise from King County allowing the installation of facilities in the County Right(s)-of Way.
- or** ☐ The sewer system improvement will require that Renton obtain a franchise from King County to install the facilities in the County Right(s)-of Way.

CONDITIONS OF CERTIFICATION:

- 1) It is the responsibility of the owner/developer to verify, by an engineering study, whether it is possible to connect by gravity line to the existing City sewer system (a private lift station may be installed, but is not desirable). The City may require, at it's option, the verification to be in the form of a letter signed by a professional civil engineer.
- 2) When new sanitary sewer lines are installed, the City typically installs or requires to have installed stub-outs to the property line. This is done as a courtesy to the property owners. The City does not guarantee a stub for all properties nor does it guarantee the condition or location of the stub.

It is the responsibility of the owner/contractor to have an approved connection from the building sewer to the City's sewer main. If there is a stub, it is in good condition, and the owner/contractor can locate it, then it is available for use. The determination of condition of existing sanitary sewer stubs shall be the sole responsibility of the City and the City's decision shall be final.

If the stub is broken or the City inspector determines that the stub's condition is not acceptable, it shall be the owner/contractor's responsibility to repair the stub, replace the stub at the existing tee, or to install a new stub and tee directly into the main. The method of repair/replacement to be determined by the City's inspector.

I hereby certify that the above sanitary sewer information is true. This certification shall be valid for one year from date of signature. (Fee information is subject to change without notice).
